Procedure coding should be based upon medical necessity, procedures and supplies provided to the patient. Coding and reimbursement information is provided for educational purposes and does not assure coverage of the specific item or service in a given case. Tissue-Tech and The Pinnacle Health Group make no guarantee of coverage or reimbursement of fees. These payment rates are nationally unadjusted average amounts and do not account for differences in payment due to geographic variation. Contact your local Medicare Administrative Contractor (MAC) or CMS for specific information as payment rates listed are subject to change. To the extent that you submit cost information to Medicare, Medicaid or any other reimbursement program to support claims for services or items, you are obligated to accurately report the actual price paid for such items, including any subsequent adjustments. CPT five-digit numeric codes, descriptions, and numeric modifiers only are Copyright AMA. (Updated January 2020).

**NOTES:**

- **SI** – Status Indicator
- **Q2** - Packaged APC payment if billed on the same claim as a HCPCS code assigned status indicator “T.” Otherwise, payment made through separate APC.
- **J1** - All covered Part B services on the claim are packaged with the primary “J1” service for the claim, except services with OPSS SI=F, G, H, L and U; ambulance services; diagnostic and screening mammography; all preventive services; and certain Part B inpatient services.
  - If two or more “J1” services appear on the same claim, the procedure with the higher rank based on cost is considered the “primary” service and payment is based upon the C-APC to which that service is assigned.
- CPT 65426: If the provider uses an amniotic membrane transplant with glue during the procedure instead of using a conjunctival graft, CPT 65426 should still be reported.
- When reporting placement of the amniotic membrane separately, CPT 66999 should be reported if glue is used.
